Skills

Technology/ Development Languages	React JS, TypeScript, JavaScript, Next JS, Node JS, Nest Js, HTML, JQuery, CSS, SCSS, Bootstrap, Material UI, Ant Design, Tailwind CSS
Databases	Postgres, MongoDB, MySQL, SQL Server
Tools	Visual Studio Code, Web Strom, Notepad++
Task and Project Management	Azure, Jira, Bitbucket, Gitlab, Git, Trello
Operating Systems	Windows, Linux

Projects

Project Title:- Tristar CRM

Duration: 6 Months

Team Size : 4

Technologies: React, Redux, Nest.js, GraphQL, Prisma

Project Description:

Tristar CRM is a comprehensive customer relationship management system. I developed the frontend using React and Redux, focusing on efficient state management and creating reusable components.

The backend, powered by Nest.js, employed GraphQL and Prisma for streamlined API interactions and data management..

Responsibilities:

- Developed the frontend with React and Redux for efficient state management.
- Created reusable UI components to enhance modularity.
- Implemented GraphQL and Prisma in Nest.js for effective API calls and data management.

Project Title:- Ysoty

Duration: 3 Month

Team Size : 2

Technologies : React, Node.js, TypeScript, MongoDB

Project Description:

Ysoty is a dynamic application that integrates React and Node.js with TypeScript support. I handled API integrations with third-party services and ensured robust data storage using MongoDB. This integration facilitated a responsive and type-safe frontend, enhancing the overall user experience..

Responsibilities:

- Integrated React with Node.js, ensuring TypeScript support for enhanced type safety.
- Executed API calls to third-party services and managed data storage with MongoDB.
- Delivered a responsive frontend that improved user experience and code reliability.

Project Title:- ShopLink Pro

Duration: 6 Month

Team Size : 4

Technologies: React.js, Nest Js, Express Js, PostgreSQL, TypeScript, HTML, CSS, Bootstrap, AWS

Project Description:

ShopLink Pro is an enterprise application which is developed to ease store management at multiple locations. It is a multi-tenant, multi-lingual and multi-role based application. Reports are generated using React JS and Nest Js (GraphQL). Github pipelines are created to automated deploy process.

Responsibilities:

- Created REST APIs using GraphQL with Nest.js.
- Utilized Prisma ORM for type-safe and efficient database operations.
- Developed the majority of the UI components.

Project Title: EliteThreads

Duration: 6 Month

Team size: 5

Technology: React-Node.js Integration with TypeScript, MongoDB

Project Description: EliteThreads offers an exceptional online shopping experience for luxury men's fashion in India. Discover our custom-made designer suits, shirts, pocket squares, partywear, jackets, blazers, pants, trousers, and tuxedos. Elevate your style with EliteThreads, where sophistication meets bespoke craftsmanship.

Responsibilities:

- Understanding business requirements
- Designing and functionality.
- Participating in internal review meetings
- Unit testing
- Actively participate in weekly client meetings (for my development phase)
- Generating daily status reports and weekly reports on my development phase
- Bug Fixes.

Project Title: Network Nexus

Duration: 6 month

Team Size: 3

Technology: React, Redux, Nodejs, Type-script

Project Description: Network Nexus is a LinkedIn-like platform in the US and UK that enables organizations to create highly engaged online communities. We simplify the process for people to experience these communities in one place, fostering engagement, collaboration, and networking for both organizations and their members.

Responsibility :

- Developed the entire UI, ensuring a seamless user experience.
- Integrated APIs for efficient data handling and communication.
- Collaborated with backend developers to align frontend and backend functionalities.
- Conducted thorough testing and debugging to ensure high-quality performance.
- Implemented responsive design principles to ensure compatibility across devices.

Project Title: InkFusion (Bloggng PlatForm)

Duration: 6 Months

Team size:4

Technology: Next.js, Nest.js, MySQL.

Project Description: InkFusion is a sophisticated blogging platform designed for seamless content creation and management.

It features SEO-friendly pages and dynamic content management capabilities, built with Next.js for a fast and responsive user experience.

The backend, developed using Nest.js and MySQL, provides robust API support and efficient database interactions, ensuring high performance and scalability for a growing user base.

Responsibility :

- Created SEO-friendly pages and dynamic content management features using Next.js.
- Developed backend APIs and handled database interactions with Nest.js and MySQL.
- Ensured high performance and scalability of the application.
- Implemented responsive design principles to ensure compatibility across devices.

Education Qualification

Degree	University/Board	Percentage
MCA	Pune University	63.179%
BCA	GTU	58.167%
H.S.C	GHSEB	56.20%
S.S.C	GHSEB	66.00%

Declaration

I am confident of my ability to work in a team. I hereby declare that the information given above is true to the best of my knowledge.
