★ Projects

Secuto IAM

Frontend: React,Redux, TypeScript,Tailwind

Backend: Node Js

Database: PostgreSQL

In my role as a full-stack developer for a web-based IAM (Identity and Access Management) program application, I handled various responsibilities. This included developing multiple pages and utilizing Redux and Context API for efficient state management.

Additionally, I successfully integrated the back-end module with the cenit module and implemented logical operations to effectively manipulate data within the API.

Ysosy (Shipping services)

Frontend: React,Next Js

Backend :Node js

Database:MongoDB

Creating a new revamped version of the website using common

react components across products.

Developed new pages by using Next Js SSG(Static site

generation) and common components.

In the backend Node.js, I executed API calls to third-party services, collected and stored data in a secured MongoDB database, and seamlessly integrated this data into the frontend React(Next js) application.

Tristar CRM

Frontend: React,Redux,TypeScript,MUI,Bootstrap

Backend: Nest Js, Prisma, GraphQL

Database: MySQL

I worked as a full-stack developer. In this role, I developed various pages, implemented API calling functions using GraphQL and Prisma, created reusable React components for the frontend, and utilized Redux for state management.

Blue-Box (Box Rentals)

Frontend: React,MUI

Backend: Node Js

Database: MySQL

In this project, as a React developer, I was responsible for creating multiple web pages, implementing API calls along with React hooks, crafting reusable front-end components, and proficiently handling state management through the Context API.
